Per Course
POA (NSW)

Client's Nominated Facility

Course Description

Evacuation Principles is designed to train staff in their roles and responsibilities before, during and after an emergency. The course highlights different emergency situations that may occur and trains staff in the response procedures. This course also includes an evacuation exercises which must be completed by all areas of a facility at least once in a 12-month period as required by AS 3745-2010. The Training includes a briefing before and debrief after the evacuation and a report with the outcomes highlighting any deficiencies that were observed during the exercise.

Course Overview

The following information, guidelines and procedures will be covered:

- Understanding emergencies, the appropriate procedures and order of evacuation
- Staff responsibilities during an emergency.
  Evacuation Exercise that is conducted in a 'controlled environment' (scheduled) to test emergency procedures
- Briefing prior to the exercise for wardens and selected staff members
- Role-playing exercises to expand on evacuation procedures
- A post-exercise debrief of exercise his held

Course Specific Information

- Please note: The Trainer will be present to observe and monitor the responses of your warden / staff only.
