Confining Emergencies

Units of Competency

PUAWER008B Confine small workplace emergencies

Course Description

Confining Emergencies is designed to train personnel to use first attack equipment and/or techniques in the workplace to control small, uncomplicated fires, spills or leaks of hazardous materials and to minimise damage from heat, smoke, flooding, accident, structural faults of civil disorder. The course is designed for personnel in the workplace who are required to confine small workplace emergencies.

Course Overview

The following information, guidelines and procedures will be covered:

- Prepare for emergency situations
- Identify and assess the type of emergency
- Safely confine emergencies where possible
- Use initial response equipment
- Report workplace emergency response
- Understand the limitations of emergency control equipment and facilities
- Identify hazards involved with initial response action
- Understand implications of incorrect use of equipment

Course Specific Information

This course has hands on practical aspects and all trainees are required to wear closed in shoes and no loose clothing.
